- ✓ Psoriasis
- ✓ Dry Skin
- ✓ Fragrance, colouring & SLS¹ free
- ✓ Suitable for all ages, including babies

500g e

Directions for use: Always wash your hands thoroughly before applying Epaderm Ointment, which can be used in three ways:
Emollient: Apply to the skin as often as required.
Skin cleanser: Use as required when washing or in the shower.
Bath additive: Melt a little Epaderm Ointment in a container of hot water and shake to mix thoroughly. Allow to cool and add to the bath but please be careful as this will make the bath surface slippery. After bathing, gently pat skin dry with a soft clean towel.
Precautions: Do not use if you are sensitive to any of the ingredients listed. If your condition worsens or you experience any undesirable effects, stop using Epaderm Ointment and discuss with your health care professional. For external use only. Avoid contact with the eyes. Do not use if the seal is broken or after the expiry date.
Warning: If this product comes into contact with dressings, clothing and bedding the fabric can be easily ignited with a naked flame. You should keep away from fire when using this product.
Storage: Store below 25°C in a dry place. Replace lid after use. Keep out of the reach of children.
